Overview

Results-driven Backend Developer with 3+ years of experience in designing, developing, and deploying scalable microservices using Java and Spring Boot. Proficient in building secure REST APIs, integrating React-based frontends, and working with SQL and NoSQL databases. Experienced in CI/CD pipelines, containerized deployments, and cloud-native architectures, with working knowledge of event-driven systems using Kafka. Passionate about writing clean, maintainable code and delivering high-quality, production-ready solutions in Agile environments.

Technical Skills

Languages/Concepts: Java, PostgreSQL, MySQL, JavaScript

Backend: Spring Boot, JPA, Microservices, REST, Docker, Python

Messaging/Streaming: GCP Pub/Sub, Kafka, AWS Queue/Stream,

Testing: JUnit, Mockito

Frontend: React.js, HTML5, CSS

Cloud & DevOps: AWS, GCP, Docker, Kubernetes, Jenkins, Git, Postman

Functional Domains: Maven, SonarQube, Agile Methodologies.

Professional Experience

**COGNIZANT TECHNOLOGY SOLUTIONS,
CLOUD BACKEND DEVELOPER**

Oct 2022-At Present

Royal Enfield (B2C), Mahindra | Chennai, India

- Developed and maintained **scalable microservices** using **Java and Spring Boot** for real-time vehicle telemetry platforms.
- Implemented key B2C features including **File upload, Onboarding a Vehicle**.
- Implemented data masking techniques for PostgreSQL, MongoDB, and file storage to protect sensitive information and ensure compliance.
- Designed and optimized **RESTful APIs** for high-volume data ingestion from IoT devices, improving backend processing efficiency.
- Integrated **Kafka** for event-driven messaging and inter-service communication to support real-time data flow.
- Implemented **Spring Data JPA and Hibernate** for efficient database interactions.
- Secured backend services using **Spring Security, JWT authentication**, and role-based access control.
- Worked with **Google Cloud Platform (GCP)** services such as **Pub/Sub, Secret Manager, Source Repository, and Log Explorer, GCS**.
- Worked with AWS service such as **API gateway, pub/sub**.
- Experienced in **MQTT client** broken such as rule, topic, instance creation with certificate to communicate with device.
- Collaborated with frontend, **QA, and DevOps** teams in an Agile environment to deliver production-ready releases
- Worked onsite at client location to provide technical support.
- Played a key role in **Spring Boot migration**, upgrading legacy services to modern Spring Boot-based microservices.
- Implemented **Redis caching** to reduce database load and improve API performance.

- Developed and maintained applications using **Java 8, Spring Boot / Spring MVC**, and **React.js**.
- Contributed to **secure backend development**, ensuring safe data transmission between vehicles and cloud systems.
- Fixed production issues in collaboration with team members, improving overall application stability.

Education

B. TECH-INFORMATION TECHNOLOGY
NATIONAL ENGINEERING COLLEGE CGPA – 8.45

2018-2022

Project

1) **Secure Bank – Full Stack Banking Application**

Java, Spring Boot, MySQL, React js | **AI:** Cursor, Claude AI

Sep 2025

- Designed and developed a **secure full stack banking application** supporting customer, account, and transaction management.
- Built backend services using **Spring Boot** with **JWT-based authentication** and **role-based access control**.
- Implemented **RESTful APIs** for deposits, withdrawals, transfers, and transaction history.
- Developed a **responsive frontend** using **HTML, CSS, and JavaScript**.
- Used **AI-assisted development tools (Cursor, Claude AI)** for code refactoring, debugging, and documentation support.

2) **Storm Prediction Dashboard** (using Python, Html).

Aug 2021

- To predict the upcoming storms in a particular state or district.
- Send the report to respective user using SMTP protocol

Certification

- | | |
|--|-------------|
| • Business English Certificate– Vantage Level (Score: 131) | BEC,2022 |
| • PostgreSQL (Intermediate) | Udemy, 2023 |
| • Java 8 Programming | Udemy, 2022 |
| • React JS | Udemy, 2024 |
| • Advanced Diploma in Python Programming | CSC, 2022 |
| • GCP/AWS Certification - Inprogress | Udemy,2025 |
| • Generative AI - Inprogress | Udemy,2025 |

Conference

- IEEE Paper Presentation & Journal Publication
- RNN-based cloud data retrieval using Fuzzy Logic (Python, Java, Firebase, ML)

April-2022

Language known

- Tamil, English
